Customer Management - Business Requirements

1 Introduction

This document describes the customer management module.

3 Functional Requirements

3.1 Search customer

Sales staff can search customers by name or phone number.
Search is case-insensitive. Results are paginated, 20 per page.

3.2 Create customer

A sales manager can create a customer with name, phone and email.
Phone must be unique.

4 Non-functional Requirements

- Search results must return within 1 second.
